The novel, set during the later stages of World War II from 1943 onwards, is frequently cited as one of the great literary works of the twentieth century. It has a distinctive non-chronological style where events are described from different characters' points of view and out of sequence so that the time line develops along with the plot.

Album of the Week

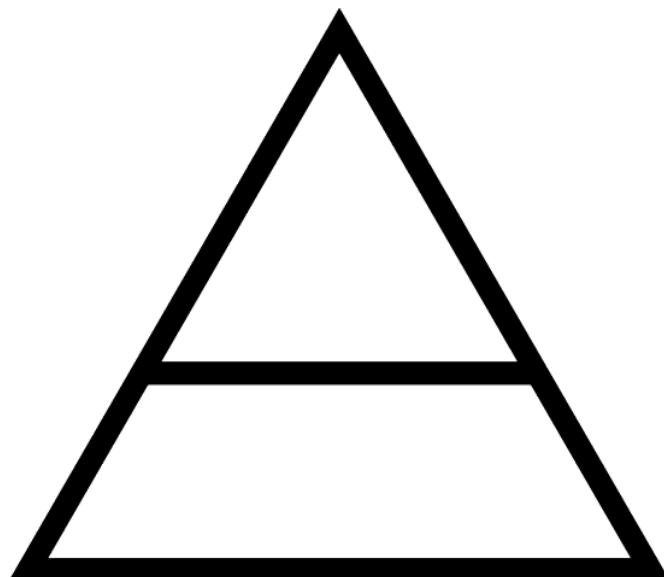

Led Zeppelin - Physical Graffiti is the sixth record by the English rock band. A double album originally released February 1975, recording sessions for the album were initially disrupted when John Paul Jones considered leaving the band. After reuniting at Headley Grange, the band wrote and recorded eight songs, the combined length of which stretched the album beyond the typical length of an LP. This prompted the band to make Physical Graffiti a double album by including previously unreleased tracks from earlier recording sessions.
